MEMORANDUM FOR: [redacted]

Bill, I have reservations about the value of the IQM for measuring anything? What do you think.

Bob

Your point is well taken in this matter. In view of recent changes in responsibility it appears that your decision on this request is authoritative.

I have mixed feelings in the matter; on the one hand I would hope that H-F can find a way of making use of the Fudge Quality Meter ~~and~~ that would be of value to all owners of this instrument; and on the other I would certainly hate to see the instrument used as a scientific measuring device, the output of which we could not accept in the light of [redacted] evaluation.
